OBJECTIVE

B.Tech Information Technology student with strong foundations in Data Structures and Algorithms and hands-on experience building full-stack web applications using React and Next.js. Seeking a software development internship to contribute to impactful products and further develop engineering skills in a collaborative, fast-paced environment.

EDUCATION

Dr. Akhilesh Das Gupta Institute of Professional Studies

B.Tech in Information Technology

- CGPA: 9.0/10.0 (Year 1 & 2)

Navyug School, Lodhi Road

Class XII (Science)

New Delhi, India

Aug 2024 – May 2028

New Delhi, India

2022 – 2023

TECHNICAL SKILLS

Programming Languages: C, C++, JavaScript

Frontend Development: HTML5, CSS3, React.js, Next.js, TailwindCSS, shadcn/ui, React Router, Leaflet.js

Tools & Platforms: Git, GitHub, VS Code

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems (OS)

PROJECTS

Issue Router | *React.js, TailwindCSS, Leaflet.js, shadcn/ui, React Router*

- Built a grievance officer dashboard that aggregates and filters civic issues, rendering them in an interactive cluster-card layout for efficient case management.
- Integrated Leaflet.js for geospatial issue mapping, enabling officers to visualize issue density across regions at a glance.
- Implemented dynamic routing with React Router and reusable UI components via shadcn/ui, improving maintainability and scalability.

BrainWave | *React.js, TailwindCSS*

- Developed a responsive single-page application (SPA) showcasing advanced UI/UX skills including smooth animations, custom component design, and pixel-perfect layouts.
- Leveraged TailwindCSS utility classes to build a consistent design system with reusable component patterns.

Foodie | *HTML5, CSS3, JavaScript*

- Designed and developed a fully functional food delivery website with an interactive menu, cart functionality, and responsive layout across devices.
- Applied vanilla JavaScript for DOM manipulation, event handling, and dynamic content rendering without any external frameworks.

ACHIEVEMENTS & ACTIVITIES

Competitive Programming

- Solved **100+ DSA problems** on LeetCode using C++, covering topics including arrays, linked lists, trees, graphs, and dynamic programming.

Hackathon — Hack and Chill (3rd Place)

- Won the **Hack and Chill** hackathon organized by the Google Developer Groups on Campus (GDGC) society, demonstrating rapid prototyping and full-stack development skills under time constraints.

Google Developer Groups on Campus (GDGC) — Member

- Active member of the GDGC chapter at college, participating in technical events, workshops, and community-driven software development initiatives.
